ACHIEVE THE BEAUTY OF ALL-ROUND HOME FURNISHINGS

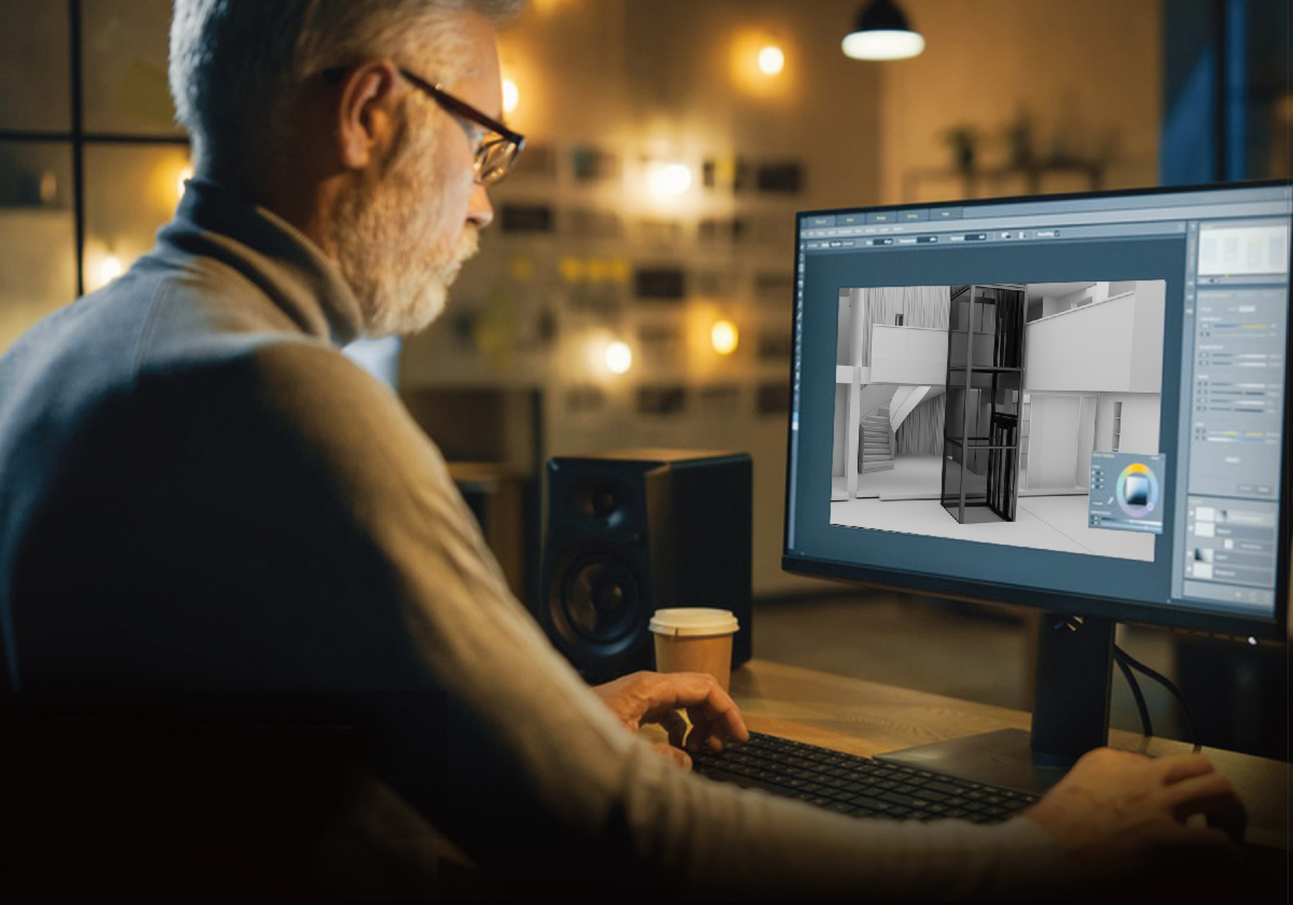
Home Lift

Homini Lift

Homini Lift

Company profile

A pioneering elevator company dedicated to integrating villa elevator design into overall home decor.
At HOMINI, there are no separate elevators, only the overall home; There is no traditional elevator, only artistic design;
There are no identical elevators, only high-end appliances tailored to your home taste.
We will create 'MINI HOME' for you, a high-end elevator that fully integrates with your home design,
achieving your unique home taste in all aspects.
"HOMINI"is also a commitment to the industry: starting from HOMINI,
the aesthetic of villa stairs will set a benchmark that cannot be ignored.
"HOMINI "is a commitment to" beauty ": the beauty of design, home decor, geometry, and fusion, all within HOMINI.



Doing it with *c*are is the answer

Q&A

How to install an elevator when space is limited?

High quality comprehensive one-stop customized solution.

How to better integrate elevators into buildings?

Personalized design, achieving exclusive customization of one villa and one elevator.

How to ensure the quality and safety of elevators?

Provide users with high-quality elevator services throughout the entire lifecycle.

Flexible Structure

We provide personalized and exclusive installation solutions based on your building structure and living needs, with five installation scenarios (outdoor shaft type, reserved concrete shaft, surrounding staircase type, hollow hall type, indoor floor openings) to fully meet your home space needs.

1. **Outdoor shaft type**
2. **Reserved concrete shaft**
3. **Surrounding staircase type**
4. **Hollow hall type**
5. **Indoor floor openings**

HM-100M

MRL structure home elevator

- Two guide rails are located on both sides of the elevator car, with uniform force distribution
- The elevator car runs smoothly and provides a comfortable riding experience
- The gantry structure is beneficial for extending the lifespan of elevators

HM-200C

Cantaliver structure home elevator

- The backpack frame structure is for the narrow and extremely deep well in the villa
- The four guides are located on the same side, effectively saving space
- Three sides opening can be achieved in this design

Security configuration

Child mode

Smart child lock and smart child border technology
Effectively prevent young children from playing with elevators

Aging friendly design

Automatic anomaly recognition function, remote video
Satisfy elderly people for safer elevator rides

Power outage emergency

Power outage automatic leveling
Run at low speed to the nearest level and release personnel

Diversified calling system

Contactless call elevator, more convenient travel

Intelligent light curtain

Millisecond level response
Non contact protection to prevent being caught

Intelligent control experience

It provides broad users with a full set of solutions.
Create smart families, tailor-make a happy life for users.

Internet of things system

Relying on the Internet of Things technology, monitoring the operation status of elevators, providing fault warnings, maintenance reminders, and remote repairs at certain times, reducing accidental stoppages and making elevator operation safer.

Early warning system

Early warning system, such as when passengers are stuck in the elevator for a long time, the system will alert family members through the APP.

Intelligent voice function

Check the status and parking floors of the elevator through mobile phones, and remotely control the elevator to the designated floor, making passengers fast and comfortable.
